Objective

Highly experienced Seawoman with over 10 years in the maritime industry. Skilled in navigation, propulsion, and deck operations, with a strong understanding of safety protocols and regulations. Proven ability to work effectively in a team environment and handle multiple tasks simultaneously. Possessing a valid medical certification, STCW95 basic safety training and a valid passport. Committed to ensuring the safe and efficient operation of vessels, and seeking a challenging role in a dynamic maritime organization.

Work & Experince

Junior Marine Engineer
XYZ Shipping Company, 2006 - 2008
Worked as a Junior Marine Engineer at XYZ Shipping Company, responsible for maintaining and troubleshooting propulsion systems, electrical systems, and navigational equipment on cargo ships.

Marine Engineer
ABC Oil Company, 2009 - 2012
Transferred to ABC Oil Company as a Marine Engineer, working on offshore oil rigs and responsible for the design, development, and maintenance of propulsion and electrical systems, as well as the management of a team of engineers.

Education

BS in Marine Engineering
Asian Institute Of Maritime Studies, -
Trained in the design, construction, and maintenance of ships, boats, and other marine vessels and structures. I understand the mechanics of how ships operate, and have expertise in areas such as propulsion systems, electrical systems, and navigational equipment. I am able to design, develop, and test marine systems, and are equipped to troubleshoot and solve problems that arise on marine vessels. I may work on cargo ships, oil tankers, cruise ships, naval ships, or in the offshore oil and gas industry.
